Use Case #1 Start Welcome Screen

| | | |
|-----------------------|---|------------------------|
| USE CASE # 1 | Start Welcome Screen | |
| Goal in Context | Player selects a new game or quit the game. As well as, including a welcome screen song | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | User has executed ITGCA. | |
| Success End Condition | A new game has started or the application is closed. | |
| Failed End Condition | User wants to start a new game, but application closes, or user is unable to close the application. | |
| Primary Actors | Application User | |
| Secondary Actors | | |
| Trigger | Opening ITGCA | |
| DESCRIPTION | Step | Action |
| | 1 | Open ITGCA.jar |
| | 2 | Welcome screen pops up |

| | | |
|---------------------|---|--|
| | 3 | Welcome screen theme plays in background |
| | 4 | Option 1: New Game |
| | 5 | Option 2: Quit Application |
| EXTENSIONS | Step | Branching Action |
| | 4a | Execution of the game. |
| | 5a | Termination of the application |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Welcome Screen | |
| Priority: | High priority for Welcome Screen because it debuts the option on whether the game is being played or not. | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | Happens every application start-up | |
| Channels to actors | Requires user to interact with an action choice | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

| | |
|--|-------------|
| ...any other management information... | none |

Use Case #2 Play No. Selection

| | |
|-----------------------|--|
| USE CASE # 2 | Player No. Selection |
| Goal in Context | Player chooses a number of players to play in the game. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | User has started the game through the Welcome Screen. |
| Success End Condition | Number of players used for the game match number of players selected. |
| Failed End Condition | Number of players used for the game does not match the number of players selected. |
| Primary Actors | Application User |

| | | |
|---------------------|---|---|
| Trigger | Start new game selected from Welcome Screen. | |
| DESCRIPTION | Step | Action |
| | 1 | Start new game selected from Welcome Screen |
| | 2 | Select Number of players |
| | 3 | Confirm number of players |
| | 4 | Screen updates with Player Name Selection Use Case action |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Player No. Selection | |
| Priority: | High priority for game because it determines the amount of players to play in the game. | |
| Performance | Time it takes for the user to choose an option. | |
| Frequency | Happens every new game started. | |
| Channels to actors | Requires user to interact with an action choice. | |
| OPEN ISSUES | Wait time for user response. | |

| | |
|--|-------------|
| Due Date | TBA |
| ...any other management information... | none |

| Create date | 6/11/2019 |

Use Case #3 Player Name Selection

| | |
|-----------------------|--|
| USE CASE # 3 | Player Name Selection |
| Goal in Context | Player types in a name for each player to play in the game. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | User has chosen a number of players in Player No. Selection Screen |
| Success End Condition | Names are assigned and saved to correct player |
| Failed End Condition | User's chosen name was not correctly assigned |
| Primary Actors | Application Users |

| | | |
|---------------------|---|--|
| Secondary Actors | None | |
| Trigger | Number of Players Screen's save button is selected | |
| DESCRIPTION | Step | Action |
| | 1 | Before continuing to play a new game, add player name. |
| | 2 | Type name for players |
| | 3 | Save button is selected |
| | 4 | Screen updates with Group Selection Screen Use Case action |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | User does not enter a name and a default name is given |
| RELATED INFORMATION | Player Name Selection | |
| Priority: | Low priority for game because it isn't heavily gameplay related | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | Happens every application start-up | |

| | |
|--|---|
| Channels to actors | Requires user to interact with an action choice |
| OPEN ISSUES | Wait time for user response |
| Due Date | TBA |
| ...any other management information... | none |
| Superordinates | none |

Use Case #4 Player picks player icon

| | | |
|-----------------------|--|--------------------------------------|
| USE CASE # 4 | Player picks player icon | |
| Goal in Context | Each player will be able to choose their player icon to be associated with the entire game. | |
| Scope & Level | Only the behavior of this use case's response is considered. | |
| Preconditions | Save button in Player Name Selection Screen is selected | |
| Success End Condition | Each player is assigned a player icon | |
| Failed End Condition | If the player decides to click save without picking a player icon, the game will ask the user to pick a player icon before proceeding. | |
| Primary Actors | Application Users | |
| Secondary Actors | System | |
| Trigger | Save button in Player Name Selection Screen is selected | |
| DESCRIPTION | Step | Action |
| | 1 | Player name is already chosen. |
| | 2 | Player will choose their player icon |

| | | |
|--|---|--|
| | 3 | System will show other players of their chosen Player Icon |
| | 5 | Repeat steps 2 to 3 until all players have a Player Icon |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Player picks Illuminati card | |
| Priority: | High priority for game because it isn't heavily gameplay related. | |
| Performance | Time it takes for the user to click Receive Group button | |
| Frequency | Happens every application start-up | |
| Channels to actors | Requires user to interact with button | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

Use Case #5 Change Music

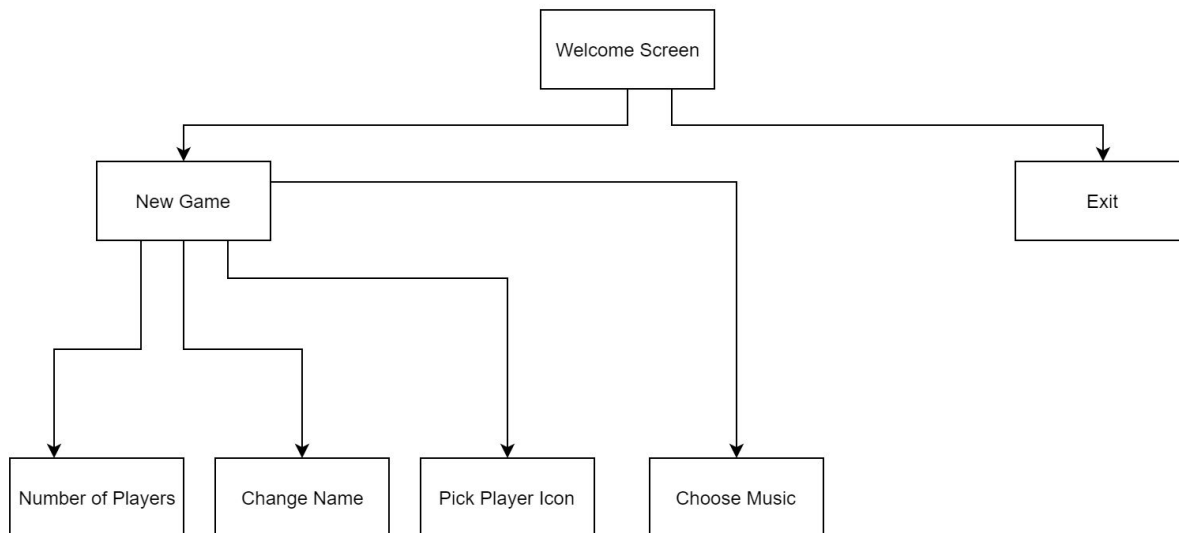

| | | |
|-----------------------|---|---|
| USE CASE # 5 | Change Music | |
| Goal in Context | The players can change the music of the background | |
| Scope & Level | Only this use case's behavior is considered | |
| Preconditions | None | |
| Success End Condition | Music will change to the new music | |
| Failed End Condition | Music does not change to selected | |
| Primary Actors | System | |
| Secondary Actors | None | |
| Trigger | Save button in Player Icon Selection Screen is selected | |
| DESCRIPTION | Step | Action |
| | 1 | Player will choose their background music |
| EXTENSIONS | Step | Branching Action |

| SUB-VARIATIONS | Step | Branching Action |
|--|---|------------------|
| RELATED INFORMATION | Change music | |
| Priority: | High priority for game because it isn't heavily gameplay related. | |
| Performance | Time it takes for the user to click Receive Group button | |
| Frequency | Happens every application start-up | |
| Channels to actors | Requires user to interact with button | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

UML for Pre-Game Use Cases

Use Case #5 Player Picks Illuminati Card

| | |
|-----------------------|--|
| USE CASE # 5 | Player Picks Illuminati Card |
| Goal in Context | Each player will need to randomly chooses 1 of the 8 Illuminati cards. Any Illuminati card that is not chosen will be removed from the game. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | Save button in Player Name Selection Screen is selected |
| Success End Condition | Each player is assigned a Group |
| Failed End Condition | If the player decides to click save without picking an illuminati card, the game will ask the user to pick a card before proceeding. |
| Primary Actors | Application Users |

| | | |
|---------------------|---|---|
| Secondary Actors | System | |
| Trigger | Save button in Player Name Selection Screen is selected | |
| DESCRIPTION | Step | Action |
| | 1 | Player name is already chosen. |
| | 2 | System will choose their Illuminati card after Get Group button is pressed |
| | 3 | System will show other players of their chosen Illuminati organization. |
| | 4 | Last chosen Illuminati card is taken out of play. |
| | 5 | Repeat steps 2 to 4 until all players have an Illuminati card. |
| | 6 | The other Illuminati card that were not chosen will be removed from the game. |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Player picks Illuminati card | |
| Priority: | High priority for game because it isn't heavily gameplay related. | |
| Performance | Time it takes for the user to click Receive Group button | |
| Frequency | Happens every application start-up | |
| Channels to actors | Requires user to interact with button | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

| | |

Use Case #6 Shuffle Deck

| | |
|-----------------------|--|
| USE CASE # 6 | Shuffle Deck |
| Goal in Context | To shuffle the deck |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | All players receive appropriate income. |
| Success End Condition | Deck is shuffled. |

| | | |
|----------------------|--|------------------|
| Failed End Condition | Deck is not shuffled. | |
| Primary Actors | System | |
| Secondary Actors | None | |
| Trigger | Turn Based Ordering, Chosen Illuminati Card, Income Distribution screen should be completed before continuing. | |
| DESCRIPTION | Step | Action |
| | 1 | Trigger |
| | 2 | Deck is shuffled |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | The deck is shuffled randomly | |
| Priority: | High because used for game logic | |
| Performance | Quickly calculated and assigned | |
| Frequency | Happens only once after the Illuminati card is chosen for each user. | |
| Channels to actors | Receive a shuffled deck for the start of the game. | |

| | |
|--|-------------|
| OPEN ISSUES | none |
| Due Date | TBA |
| ...any other management information... | none |
| Superordinates | none |
| Subordinates | none |

Use Case #7 Determine Player Order

| | | |
|-----------------------|--|---|
| USE CASE # 7 | Determine Player Order | |
| Goal in Context | Determine an order for which players will play | |
| Scope & Level | the behavior of Die Roll use case's response is considered for run logic | |
| Preconditions | Determine Player Organization "Use" is completed | |
| Success End Condition | Players are correctly ordered | |
| Failed End Condition | In-game player ordering is not accurate | |
| Primary Actors | User | |
| Secondary Actors | System | |
| Trigger | Determine Player Organization "Use" is completed | |
| DESCRIPTION | Step | Action |
| | 1 | Determine Player Organization "Use" is completed |
| | 2 | Player selects roll die button |
| | 3 | System rolls die and displays number |
| | 4 | Repeat steps 2-3 until all players rolled |
| | 5 | System determines order of players based on rolls |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | If player ties with another player, they are required to roll again between each other to determine order |

| | |
|--|---|
| RELATED INFORMATION | Determine Player Order |
| Priority: | High as it is required for a turn phase in the game |
| Performance | High performance so that the dice rolls can be random and compared to other player's rolls. |
| Frequency | The player order will only be determined once at the beginning of the game. |
| Channels to actors | User interacts with dice roll button. |
| OPEN ISSUES | Players can receive the same dice value. |
| Due Date | TBA |

Use Case #8 Collect Income

| | |
|-----------------------|---|
| USE CASE # 8 | Collect Income |
| Goal in Context | Deposit income from the bank on the Group's card |
| Scope & Level | Only the behavior of this use case's response is considered |
| Preconditions | Enter start of a game phase |
| Success End Condition | Income is correctly distributed |
| Failed End Condition | Income is incorrectly distributed or fails |
| Primary Actors | System |

| | | |
|--|---------------------------------------|---|
| Secondary Actors | | |
| Trigger | Start of a player's turn is commenced | |
| DESCRIPTION | Step | Action |
| | 1 | Start of a player's turn is commenced |
| | 2 | System generates income amount |
| | 3 | System adds income amount onto the group's card |
| | 4 | |
| | 5 | |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Collect Income | |
| Priority: | High because it affects gameplay | |
| Performance | Quickly does the task | |
| Frequency | Happens frequently.(Every turn phase) | |
| Channels to actors | Needs access to group's card | |
| OPEN ISSUES | None | |
| Due Date | TBA | |
| ...any other management information... | none | |
| Superordinates | none | |

Use Case #9 Draw Card

| | | |
|-----------------------|---|---|
| USE CASE # 9 | Draw Card | |
| Goal in Context | Draw a card from a deck | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | Income is distributed on player's turn | |
| Success End Condition | If card is correctly taken out of the deck | |
| Failed End Condition | Card is not taken out of the deck or the action(face-up/face-down) after a drawn card is taken is incorrect | |
| Primary Actors | system | |
| Secondary Actors | User | |
| Trigger | Step 1 in the Sequence of Play(turn phase sequence) is completed | |
| DESCRIPTION | Step | Action |
| | 1 | Step 1 in the sequence of play is completed |
| | 2 | System draws a card from the deck |
| | 3 | Option 1: System gives user a group card |
| | 4 | Option 2: System gives user a special card |
| EXTENSIONS | Step | Branching Action |
| | 2a | System displays card face up on board |

| | | |
|--|--|---|
| | 3a | User displays the card face-up or face-down |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Draw Card | |
| Priority: | High because used heavily in gameplay | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | Happens every turn phase | |
| Channels to actors | Requires user to interact with an action choice. | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

Use Case #10 Take two “actions”

| | |
|-----------------------|--|
| USE CASE # 10 | Take two “actions” |
| Goal in Context | User selection of 2 choices is taken |
| Scope & Level | Only the behavior of this use case’s response is considered |
| Preconditions | Step 2 in Sequence of Play(turn phase sequence) is completed |
| Success End Condition | 2 actions are selected and executed |

| | | |
|--|---|---|
| Failed End Condition | User does not have 2 registered selections, incorrect selections are registered, or selections are not executed | |
| Primary Actors | User | |
| Secondary Actors | System | |
| Trigger | Step 2 in Sequence of Play is completed | |
| DESCRIPTION | Step | Action |
| | 1 | Step 2 in Sequence of Play is completed |
| | 2 | System prompts user with 2 drop down menus for action selection |
| | 3 | User chooses 2 and clicks “ok” button |
| | 4 | System registers selection and commences both of the actions |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | |
| RELATED INFORMATION | Take two “actions” | |
| Priority: | High since gameplay heavily relies on this action | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | Happens every turn phase | |
| Channels to actors | Requires user to interact with an action choice. | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

Use Case #11 Actions: Choosing Attack

| | | |
|-----------------------|---|--|
| USE CASE # 11 | Actions: Choosing Attack | |
| Goal in Context | Pick between 3 attack choices and commence attack | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | Within the step 3 phase of Sequence of Play(turn phase sequence) and chosen to be executed | |
| Success End Condition | Correct attack choice is executed | |
| Failed End Condition | Incorrect attack choice is executed or not at all | |
| Primary Actors | User | |
| Secondary Actors | System | |
| Trigger | Is chosen and called upon in "picking two free actions" | |
| DESCRIPTION | Step | Action |
| | 1 | Is chosen and called upon in "picking two free actions" |
| | 2 | System gives the player 3 choices: control, neutralize, or destroy |

| | | |
|--|---|--|
| | 3 | User chooses an option from the drop-down menu and click "ok" button |
| | 4 | System calls upon the attack action |
| | 5 | |
| | 6 | |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Actions:Attack | |
| Priority: | High since gameplay heavily relies on this action | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | May happen every turn phase | |
| Channels to actors | Requires user to interact with an attack action choice. | |
| OPEN ISSUES | Wait time for user response | |
| Due Date | TBA | |

Use Case #12 Actions: Transfer Money

| | |
|---------------|-------------------------|
| USE CASE # 12 | Actions: Transfer Money |
|---------------|-------------------------|

| | | |
|-----------------------|--|---|
| Goal in Context | A Group, as an action, transfers any of its money to an adjacent Group | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | Is chosen in step 3 in Sequence of Play(turn phase) | |
| Success End Condition | Correct amount of money is successfully transferred over | |
| Failed End Condition | incorrect amount of money is successfully transferred over or not at all | |
| Primary Actors | User | |
| Secondary Actors | system | |
| Trigger | Is chosen and called upon in "picking two free actions" | |
| DESCRIPTION | Step | Action |
| | 1 | Is chosen and called upon in "picking two free actions" |
| | 2 | User enters amount to transfer and who to transfer |
| | 3 | System transfers amount to the target |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Actions:Transfer Money | |
| Priority: | High since gameplay heavily relies on this action | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | May happen every turn phase | |

| | |
|--|---|
| Channels to actors | Requires user to interact with an attack action choice. |

Use Case #13 Actions: Moving a Group

| | |
|-----------------------|--|
| USE CASE # 13 | Actions: Moving a Group |
| Goal in Context | A player, as an action, reorganizes his Power Structure by moving a Group to a vacant outgoing control arrow |
| Scope & Level | Only the behavior of this use case's response is considered |
| Preconditions | Within the step 3 phase of Sequence of Play(turn phase sequence) and chosen to be executed |
| Success End Condition | Correct group is moved to a correct position |
| Failed End Condition | Incorrect group is moved or moved to incorrect position |
| Primary Actors | User |
| Secondary Actors | System |

| | | |
|--|---|---|
| Trigger | Is chosen and called upon in “picking two free actions” | |
| DESCRIPTION | Step | Action |
| | 1 | User chooses a group and a location |
| | 2 | System moves selected group to location |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Actions: Moving a Group | |
| Priority: | High since gameplay heavily relies on this action | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | May happen every turn phase | |
| Channels to actors | Requires user to interact with a choice. | |

Use Case #14 Take any “free actions”

| | |
|---------------|-------------------------|
| USE CASE # 14 | Take any “free actions” |
|---------------|-------------------------|

| | | |
|-----------------------|---|--------------------------------------|
| Goal in Context | User selects a choice from a list of choices is taken | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | Step 2 in Sequence of Play(turn phase sequence) is completed | |
| Success End Condition | User has registered a selection and correct registered selection is executed | |
| Failed End Condition | User has no registered selection or incorrect registered selection is executed | |
| Primary Actors | User | |
| Secondary Actors | System | |
| Trigger | Free actions may be taken before, between, or after a player's regular two actions. Thus after step 2 in Sequence of Play | |
| DESCRIPTION | Step | Action |
| | 1 | User selects to use "free actions" |
| | 2 | System executes selected free action |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Take any "free actions" | |
| Priority: | High since gameplay heavily relies on this action | |
| Performance | Time it takes for the user to choose an option | |
| Frequency | Happens every turn phase | |
| Channels to actors | Requires user to interact with a choice. | |
| OPEN ISSUES | Wait time for user response | |

Use Case #15 Free Actions: Dropping Groups

| | |
|-----------------------|--|
| USE CASE # 15 | Free Actions: Dropping Groups |
| Goal in Context | A group is removed by player from their Power Structure and added back to the uncontrolled area. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | It must be during the current player's turn phase. |
| Success End Condition | The player removes the group from their Power Structure. The removed card is then added to the uncontrolled area. |
| Failed End Condition | The player did not remove the group from their Power Structure. The card remains in the player's Power Structure instead of the uncontrolled area. |
| Primary Actors | Game user |

| | | |
|---------------------|--|---|
| Secondary Actors | None | |
| Trigger | The player no longer wants the group in their Power Structure. | |
| DESCRIPTION | Step | Action |
| | 1 | The player no longer wants the group in their Power Structure. |
| | 2 | The player returns the group to the uncontrolled area. |
| | 3 | Puppets of the group must also become uncontrolled. |
| EXTENSIONS | Step | Branching Action |
| | 1a | The player's Power Structure slots are full. |
| | 1b | The player wants to exchange the group in their power structure with another one. |
| | 1c | The player does not like the group in their Power Structure. |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | The player exchanges the group in their Power Structure with an uncontrolled group. |
| | 2 | The player removes a group from their Power Structure without replacing it. |
| RELATED INFORMATION | Free Actions: Dropping a group | |

| | |
|--|---|
| Priority: | Medium priority because the player is not required to drop a group during their turn. |
| Performance | Dropping a group will depend on the user deciding which group the player wants to drop. |
| Frequency | Whenever it is the player's turn. |
| Channels to actors | This will be interactive with the user giving the user the ability to choose which groups are in their Power Structure. |
| OPEN ISSUES | The user tries to drop a group from their Power Structure when they do not have a group in the slot. |

Use Case #16 Free Actions: Aiding an Attack

| | | |
|-----------------------|--|--------|
| USE CASE # 16 | Free Actions: Aiding an attack | |
| Goal in Context | Using Transferable Power to assist another group. | |
| Scope & Level | Only the behavior of this use case's response is considered. | |
| Preconditions | An organization is attacking a group. | |
| Success End Condition | Player assisted another group in an attack | |
| Failed End Condition | Player did not assist another group in an attack. | |
| Primary Actors | Game user. | |
| Trigger | Another organization is attacking a group. | |
| DESCRIPTION | Step | Action |

| | | |
|--|--|---|
| | 1 | Another organization is attack a group. |
| | 2 | The player chooses to aid the attack. |
| EXTENSIONS | Step | Branching Action |
| | 2a | The attack is successful |
| | 2b | The attack is not successful |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Free Actions: Aiding an Attack | |
| Priority: | Medium because the play can choose to aid or not to aid an attack. | |
| Performance | The performance will be based on the user's decision to aid an attack or not. | |
| Frequency | The frequency will be whenever an attack against a group occurs. | |
| Channels to actors | This will be interactive and allow the user to aid other organizations on attacks. | |
| OPEN ISSUES | The aided attack does not count towards player's objectives. | |

Use Case #19 Special-power actions

| | |
|-----------------------|---|
| USE CASE # 19 | Special-power actions |
| Goal in Context | Based on the player's Illuminati organization, a special power action occurs. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | It must be during the current player's turn phase. |
| Success End Condition | The Illuminati organization's special power is activated. |
| Failed End Condition | The Illuminati organization's special power is not activated. |
| Primary Actors | System |
| Secondary Actors | None |
| Trigger | It must be the player's turn and the player must either be the Gnomes of Zurich or the Bermuda Triangle organization. |

| | | |
|---------------------|---|--|
| DESCRIPTION | Step | Action |
| | 1 | During the player's turn, they check which Illuminati organization they are. |
| | 2 | Based on their organization, a special power is activated. |
| EXTENSIONS | Step | Branching Action |
| | 2a | The player's organization is the Gnomes of Zurich. |
| | 2b | The player's organization is the Bermuda Triangle |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | The Gnomes of Zurich may redistribute their money between treasuries. |
| | 2 | The Bermuda Triangle may reorganize their Power Structure. |
| RELATED INFORMATION | Special-power activation | |
| Priority: | Medium because the player may or may not be one of the two organizations. | |
| Performance | The performance will be based on checking the player's Illuminati card and then activating the special power. | |
| Frequency | This will happen on the turn of players with the Gnomes of Zurich or Bermuda Triangle organization card. | |

| | |
|--|--|
| Channels to actors | This will all be done by the system. The system will check the player's organization and activate the correct special power. |
| OPEN ISSUES | The system will perform the special power without the user knowing what is happening with the game. |

Use Case #20 Add targets

| | | |
|-----------------------|---|---|
| USE CASE # 20 | Add targets | |
| Goal in Context | Groups are added to the uncontrolled groups area until there are 2. | |
| Scope & Level | Only the behavior of this use case's response is considered. | |
| Preconditions | There are less than 2 groups in the uncontrolled groups area. | |
| Success End Condition | There are 2 groups in the uncontrolled group area. | |
| Failed End Condition | There are less than 2 groups in the uncontrolled groups area. | |
| Primary Actors | Game user | |
| Secondary Actors | None | |
| Trigger | The uncontrolled area has less than 2 groups. | |
| DESCRIPTION | Step | Action |
| | 1 | The uncontrolled area has less than 2 groups. |

| | | |
|--|--|--|
| | 2 | Player draws cards and adds the card into the uncontrolled area until there are 2 uncontrolled groups. |
| EXTENSIONS | Step | Branching Action |
| | 2a | Special card is drawn. |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | Special card is discarded. |
| RELATED INFORMATION | Add targets | |
| Priority: | The priority will be high because this happens at the end of every turn. Before the next person's turn can begin, there must be 2 groups in the uncontrolled area. | |
| Performance | The performance will be based on how long it takes to put 2 groups in the uncontrolled area. | |
| Frequency | This will happen at the end of a player's turn when the uncontrolled area has less than 2 groups. | |
| Channels to actors | This will be interactive with the user, having the user draw until there are 2 groups in the uncontrolled area. | |
| OPEN ISSUES | There will be an issue if the user continues to draw until there are no cards left in the deck. | |

Use Case #21 Illuminati Card: The UFOs

| | |
|-----------------|--|
| USE CASE # 21 | Illuminati Card: The UFOs |
| Goal in Context | Achieve one of the seven goals set by user at the beginning of the game. |
| Scope & Level | Only the behavior of this use case's response is considered. |
| Preconditions | It must be during the current player's turn phase. |

| | | |
|-----------------------|---|------------------------------------|
| Success End Condition | The user accomplishes the goal they chose for the UFO organization. | |
| Failed End Condition | The user was not able to accomplish the goal they chose for the UFO organization. | |
| Primary Actors | Application system | |
| Secondary Actors | None | |
| Trigger | After transfer money in regard to the sequence of play. | |
| DESCRIPTION | Step | Action |
| | 1 | User picks one of seven goals. |
| | 2 | Hide identity. |
| | 3 | Attack twice per turn. |
| | 4 | Be the last organization standing. |
| EXTENSIONS | Step | Branching Action |
| | 3a | User can also aid twice per turn. |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Illuminati Card: The UFOs | |

| | |
|--|---|
| Priority: | High priority because the Illuminati card description can not be modified to a users standard but follow the gameplay of the original game. |
| Performance | The player interaction will depend on the users response time through out the game. |
| Frequency | This use case happens once every round for each of the players. |

Use Case #22 Objectives of “The Servants of Cthulhu” to win

| | |
|---------------|--|
| USE CASE # 22 | Objectives of “The Servants of Cthulhu” to win |
|---------------|--|

| | | |
|-----------------------|---|---|
| Goal in Context | The goals of The Servants of Cthulhu is to destroy. The player gets an extra +2 on any attempt to destroy any Group. Since the objective of the game is to destroy eight other Groups. If they knock any other Illuminati out of the game by taking away its last group, the destroyed Illuminati counts towards their total. | |
| Scope & Level | Only the behavior of this use case's response is considered | |
| Preconditions | The player owns their illuminati card to know their description of the Illuminati card.. After knowing their card they would need to commence Step 1-5 to play their special power of their designated Illuminati Card. | |
| Success End Condition | The success of Servants of Cthulhu is to capture, neutralize, or destroy the last group because the destroyed Illuminati counts as a kill. | |
| Failed End Condition | Does not complete the objectives of the Illuminati card. | |
| Primary Actors | The application system is the primary actors. | |
| Secondary Actors | none | |
| Trigger | After transfer money in regard to the sequence of play. | |
| DESCRIPTION | Step | Action |
| | 1 | Start destroying Groups early to meet your goal of eight. |

| | | |
|--|---|--|
| EXTENSIONS | Step | Branching Action |
| | 3a | The rest of Illuminati might not help you destroy the other player entirely. |
| SUB-VARIATIONS | Step | Branching Action |
| RELATED INFORMATION | Objectives of “The Servants of Cthulhu” to win | |
| Priority: | High priority because the Illuminati card description can not be modified to a users standard but follow the gameplay of the original game. | |

Use Case #29 Attack to Destroy

| | |
|-----------------------|--|
| USE CASE # 29 | Attack to Destroy |
| Goal in Context | Attacker rolls "Power minus Power." The defending Group defends with its Power rather than its Resistance. |
| Scope & Level | Only the behavior of this use case's response is considered |
| Preconditions | Selections from different types of attacks |
| Success End Condition | The end goal is to control other organizations |

| | | |
|----------------------|---|---|
| Failed End Condition | A roll of 11 or 12 results in automatic failure of the attack, no matter how much Power was involved. | |
| Primary Actors | The application system is the primary actors. | |
| Secondary Actors | none | |
| Trigger | A list of attack controls | |
| DESCRIPTION | Step | Action |
| | 1 | A Group with no Power cannot be destroyed except by the Special Card Whispering Campaign. |
| | 2 | Group with different philosophies destroy each other which keep powerless Groups from organizing enough to control other Groups also make them too diffuse to wipe out. |
| | 3 | If the attack succeeds, the target Group goes to the dead pile. Its subordinate Groups are not destroyed, but become uncontrolled. |
| | 4 | You may try to destroy a Group you already control. In this case, the target's closeness to its Illuminati does not protect it. But no Group may attack itself or aid an attempt to destroy itself. |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |

Use Case #31 Roll Dice

| | |
|-----------------------|--|
| USE CASE # 31 | Roll Dice |
| Goal in Context | To randomly generate 2 numbers. Each number is between 1-6 |
| Scope & Level | This only takes account of its own behavior |
| Preconditions | Called upon |
| Success End Condition | Dice correctly returns the one value(1-12) added from 2 random numbers |
| Failed End Condition | 2 random numbers are not correctly added. Number is below 1 or above 12. |
| Primary Actors | System |

| | | |
|---------------------|---|-----------------------------------|
| Secondary Actors | None | |
| Trigger | Called Upon | |
| DESCRIPTION | Step | Action |
| | 1 | System generates 2 random numbers |
| | 2 | System adds 2 numbers |
| | 3 | System gets the new 1 value |
| EXTENSIONS | Step | Branching Action |
| SUB-VARIATIONS | Step | Branching Action |
| | 1 | |
| RELATED INFORMATION | Roll Dice | |
| Priority: | High priority because the gameplay of the game relies on this. | |
| Performance | The player interaction will depend on the users response time through out the game. | |
| Frequency | This use case may happen once every round for each of the players. | |
| Channels to actors | Requires user to interact with an action choice. | |
